HOSSEIN GERAMI

React Mobile App Developer | SaaS + System Integrations

✉ h.gerami100@gmail.com ☎ +61 435 827 842 in www.linkedin.com/in/hossein-gerami
⌨ https://github.com/h-gerami

Hi, I'm Hossein — a developer with a passion for building smooth, reliable web and mobile apps. I mostly work with React and React Native, but over time, I've also picked up solid experience in backend and cloud systems like Node.js and AWS.

Lately, I've been leading integration projects at an Australian startup, connecting our platform with tools like Microsoft Dynamics, Xero, MYOB, and other CRMs and finance systems. It's been a great mix of technical challenge and real-world problem-solving.

I love working with friendly, collaborative teams and always bring curiosity, creativity, and strong time management to the table. Whether it's building features, fixing tricky bugs, or figuring out how different systems can work together, I'm always up for it.

EXPERIENCE

Software Developer – React Native / Integration Customer Success

quickclaim - Fulltime

📅 June 2022 – Present

- Developed QC-card and QC-pay, financial service mobile applications for iOS and Android using React Native, serving 4.4+ million Australians with disabilities.
- Maintained and extended quickclaim, a React-based web platform supporting accessible financial services.
- Built and maintained RESTful APIs using Node.js, TypeScript, and AWS, ensuring scalable, secure backend operations.
- Implemented automated testing for APIs and critical components to ensure code quality and reliability.
- Shifted focus to lead integration efforts between quickclaim and a wide range of external systems:
- CRMs: Microsoft Dynamics, HubSpot, and various local Australian CRMs.
- Finance platforms: MYOB, Xero, Sage, and Microsoft-based financial systems.
- Contributed to system design and architecture planning to ensure smooth scalability as user and partner demand grows.
- Managed secure data flows, syncing customer, invoice, and claim data between platforms in real time.
- Actively engage with customers via calls to guide them through product usage, accelerate integration onboarding, and resolve technical issues across all areas. Deliver prompt, clear, and helpful responses to ensure high customer satisfaction.

Senior Front-End Developer (React | Node.js)

LERNE24 - Contract

📅 Apr 2021 – May 2022   📍 Remote

- Developed the Lerne24 hybrid mobile application, an education management platform built with Ionic and React, supporting four languages for learning.
- Used TypeScript as the main programming language to ensure scalable and maintainable code.
- Built custom plugins, including interactive features like an Instagram-style story component using React.
- Utilized the Feathers.js library to build a lightweight, real-time backend service layer, enabling efficient communication between the mobile app and server.

MOST PROUD OF

Multitasking
Able to handle multiple tasks on a daily basis.

Persistence & Loyalty
Honest and trustworthy when a company count on me

Flexible
In working hours, being able to work evenings and weekends

Active
Always energetic and eager to learn new skills

Creativity
Creative approach to problem solve

SKILLS

Soft Skills

Creativity | Time Management | Patience | Communication | Enthusiasm | Collaboration

Tools & Development Practices

Git | GraphQL | Firebase | API Integration | Atlassian | Testing & Debugging | Webpack | Jest | Agile Methodologies

Technical Skills

React | React Native | Typescript | Node.js | Express.js | MySQL | HTML | CSS | SCSS | Bootstrap | Material UI | PWA | WordPress | WooCommerce | AWS

- Authored detailed technical documentation covering architecture, implementation steps, and project configuration for smooth onboarding and handover.
- Configured Firebase services for push notifications across both Android and iOS platforms.
- Worked within the Atlassian ecosystem, leveraging Jira, Bitbucket, Confluence, and Backlog for project management, version control, and collaboration.

React and React Native developer
SmartHoom(start-up, Co)

📅 21/5/2020–19/3/2021 　📍 Iran

- Developing Gardenia mobile application (IoT Services App) for both Android and iOS by React Native
- Implementing GraphQL for structured and efficient API communication.
- Building mobile functionality to connect with three types of IoT devices using WiFi, Bluetooth, and UDP protocols.
- Developing a custom Bluetooth communication protocol using the Ble-Ple library in React Native.
- Working with microprocessors to enable hardware-level integrations with the mobile app.
- Creating and optimizing a WordPress website with a focus on SEO best practices.
- Using Jira to manage tasks, track progress, and coordinate project workflows.

React Native Software Developer
Tahsilgaran Roshd Navabegh Javan Co

📅 August 2019 - May 2020 　📍 Iran

- Developing a native mobile application (Education Management App), created by React Native that supports 4 languages to learn
- Using typescript as the main programming language of the project
- Creating custom plugins like Instagram-story using React
- Creating documentation regarding the structure, implementation steps, and settings of all projects
- Setting up Firebase configurations to have notifications on both Android and iOS applications
- Using Atlassian and all its services, like Jira, Bitbucket, Confluence, Backlog, ...

Front-End Software Developer
Mir Alavi IT Training institute

📅 January 2019 - August 2019 　📍 Iran

- Developing Aloostad mobile application (B2C Educational App) for Android by React Native
- Creating Aloostad website (B2C Educational Web app) by Angular Framework
- Developing Aloostad back-end Created by Asp.net core 2
- Developing Aloostad panel (Dashboard for Teachers Web app) by Angular

Software developer - Mobile
Hihab

📅 March 2018 - December 2018 　📍 Iran

- Developing Hihab mobile application (Habit Tracker App) for Android by React Native

EDUCATION

Bachelor's Degree (Software Engineering)
Azad University (IAU)
📅 2014 – 2018

LANGUAGES

English
Persian
German

- Creating a high-performance custom pie-chart all by react-native-svg in 1000 lines of code
- Using React new version and using Hooks
- Using Git and agile methodology
- Working with GraphQL and its API's structure

Software developer - Web

Sepidan

📅 January 2016 - Dec 2017   📍 Iran

- Converting Adobe PSD from UI/UX to Html, CSS, Bootstrap, Jquery theme
- Develop PHP CMS Website (Wordpress, Drupal, Magneto) Website
